Total acres to be changed ____28,154____

Description of area and comments

This land is continuous to the current SRA and is not included due to a line of convenience. The lands share the same vegetation and watershed values of the adjacent SRA across the road. The land is primarily used for livestock grazing and has some oil fields as well. The California Department of Fish and Game have several wildlife preserves within this new inclusion. Several of the parcels are Federal which is consistent with the SRA lands on the west side of the San Joaquin Valley. The new boundary will be placed on I-5 to the north east as is the current boundary and then follow the canal to the south. The south boundary will be placed on Jayne road and then follow Calaveras road and parcel boundaries to the northwest back to Palmer road, which is the current boundary. Some annual farm land is included in this due to the first line of convenience from the toe of the slope and the use of parcel lines as boundaries.

If appropriate: Local Fire Jurisdiction
